

UNITED ARAB REPUBLIC

SINAI FIELD ARMY

The United Arab Republic operated in the deserts of Egypt, the Sinai and Yemen, so its uniforms were an appropriate light sand colour. The remainder of their equipment was of Soviet origin, suitably repainted in a sand colour in the case of the helmets.

UAR ARMoured VEHICLES

Arab tanks were supplied in the Soviet Army's standard green paint (Russian Uniform (924)), but were completely over-painted in a pale sand colour with no camouflage and very few markings. Some tanks may have carried vehicle numbers on the turret sides, and some pictures show eagles and other markings in parades.
